PETROTECH HERITAGE

Petrotech was first held in 1995 and it was clear from the response to the inaugural event that it had a bright future as a focal point for India's energy industry. The event has continued to develop and is now respected as the leading forum in South Asia for debating the issues that face the global hydrocarbon industry.

Petrotech is a biennial event held under the aegis of Ministry of Petroleum and Natural Gas. Each of the eleven conferences and exhibitions held since 1995 have set higher standards, building momentum and uniting the upstream, midstream, downstream, HSE and renewable energy sectors in helping to secure India's energy needs as well as promoting the drive towards energy independence.

Petrotech Conference and Exhibition will aim for tangible contributions to the issues of shaping an equitable and sustainable energy basket, diversifying the global energy basket, creating capacity to service the emerging energy basket, aligning policy with the emerging energy basket and global partnerships for sustainable energy solutions. PETROTECH-2016 is planned on the **Theme:- "Hydrocarbons to fuel the future: Choices & Challenges"** This apparently linear theme conjures a multi-dimensional template of the emerging global energy industry. A number of factors like population growth, development, economics, investment and infrastructure needs, geopolitics, and the anticipated impact of climate change - the current global energy system is unsustainable in its present form. But in the absence of replacement technologies and clean energy forms that are both scalable and affordable, conventional sources of energy and related infrastructure need to deliver for decades to come, even as policymakers undertake efforts to transform the energy system. The theme attempts to extrapolate the current developments in the global energy sector and probe to secure an outline of the challenges and opportunities for all the stakeholders of the energy industry. Clearly, the theme has a number of dimensions that could be visited for discussion in PETROTECH-2016.

INDIAN OIL CORPORATION LTD.

Indian Oil Corporation Limited (IndianOil) is India's largest commercial enterprise, with a sales turnover of Rs. 3,99,601 crore (US\$ 61 billion) and profits of Rs. 10,399 crore (US\$ 1589 million) for the year 2015-16. IndianOil is ranked 161st among the world's largest corporates (and first among Indian enterprises) in the prestigious Fortune 'Global 500' listing for the year 2016. As India's flagship national oil company, with a 33,000-strong work-force currently, IndianOil has been meeting India's energy demands for over half a century. With a corporate vision to be **'The Energy of India'** and to become 'A globally admired company,' IndianOil's business interests straddle the entire hydrocarbon value-chain – from refining, pipeline transportation and marketing of petroleum products to exploration & production of crude oil & gas, marketing of natural gas and petrochemicals, besides forays into alternative energy and globalisation of downstream operations. Having set up subsidiaries in Sri Lanka, Mauritius and the UAE, the Corporation is simultaneously scouting for new business opportunities in the energy markets of Asia and Africa. It has also formed about 20 joint ventures with reputed business partners from India and abroad to pursue diverse business interests.
